

WORKSHOP AND FIELD SEMINAR CREATING A SCIENTIFIC DOCUMENTARY FOR THE GENERAL PUBLIC

Learn every step of creating a scientific documentary for the general public, guided by experts in scientific communication and video production.

OBJECTIVES

- Discover the importance of science communication in promoting your research and advancing your academic career.
- Learn and apply all the steps involved in creating a science outreach video.
- Produce a short documentary (5 to 8 minutes) centered on the majestic Etna volcano in Sicily, exploring its geology, the seismic and volcanic risks associated with its activity, and the agricultural benefits it provides to the local population.

OUTCOMES

- Master the art of communicating your research through video.
- Get hands-on experience with video equipment and video editing software.
- Learn how to convey the scientific method and make science exciting to educate and raise awareness of specific scientific issues.

 **JUNE 16-17, 2025**
 **UNIVERSITY OF GENEVA**
Preparation of the storyboard

 **AUGUST 28 - SEPTEMBER 01, 2025**
 **SICILY, ITALY**
Capture all the footage to create the documentary

 **OCTOBER 27-28, 2025**
 **UNIVERSITY OF GENEVA**
Video editing on DaVinci Resolve
